PROFILE

FP&A professional with a year of hands-on experience in financial planning and analysis, currently completing an MSc in Accounting & Finance at the University of Aberdeen. I build 3-statement financial models, run budgeting and forecasting cycles, and produce management reporting that gives leadership a clear picture. In my last role I caught a 7% YoY cost deviation through variance analysis and helped define the corrective actions; separately, automating three month-end workflows in Excel cut close time by around a day per cycle. Outside of work I have independently built a full DCF valuation of Rolls-Royce Holdings and a four-page Power BI dashboard across BMW Group's global sales data. Looking for FP&A Analyst, Financial Analyst, or Management Accounting roles where rigorous analysis actually matters.

EXPERIENCE

Trainee Accountant – FP&A | *Manish Saraogi & Associates, Siliguri, India* Mar 2023 – Feb 2024

Full-time · 1 year

- Built and maintained integrated 3-statement models (P&L, cash flow, balance sheet) used for monthly revenue forecasting, scenario analysis, and senior management decisions across a 12-month engagement.
- Owned the annual budgeting cycle and rolling 12-month forecast. Through quarterly variance analysis, identified a 7% YoY deviation in operational expenditure, escalated the risks to leadership, agreed corrective actions across three cost lines, and tracked resolution into the next forecast cycle.
- Prepared monthly management accounts under IFRS/GAAP for 12 consecutive periods, packaging actuals-vs-budget variance into reporting packs for both finance and non-finance stakeholders.
- Partnered with operations and procurement to align revenue forecasting with operational realities, and built a shared KPI tracker in Excel that monitored utilisation, margin, and cost variance in one place.
- Month-end close was running at 5+ days due to manual journal and reconciliation work. Automated three recurring processes using INDEX-MATCH and pivot tables, cutting close time by roughly 20% (about one day per cycle) and removing a recurring class of input errors.

Food & Beverage Assistant | *P&J Live, Aberdeen, UK* Oct 2025 – Present

Part-time · current

- Customer-facing role in a venue hosting 10,000+ visitors per event, requiring composure and consistency under pressure.
- Regular collaboration with colleagues from varied backgrounds, building stakeholder communication skills that translate directly to business partnering.

INDEPENDENT PROJECTS

DCF Valuation – Rolls-Royce Holdings plc | Mar 2026

Built a six-section DCF model from scratch using FY2020–FY2024 Annual Report data. Projected revenue from £18.9bn to £25.5bn (FY2029E) using growth assumptions tied to historical EBIT margins. Calculated WACC at 9.0%, applied both perpetuity growth (TGR 3%) and EV/EBITDA exit multiple (10x) methods, and blended the two to arrive at an intrinsic value of 471p per share – a 24% discount to the 620p market price at the time. Built a two-way sensitivity table across WACC vs terminal growth rate and WACC vs EBIT margin to stress-test the base case.

Power BI KPI Dashboard – BMW Group Global Sales | Mar 2026

Built a four-page interactive Power BI dashboard analysing €31bn of BMW Group revenue across four regions and eight models (2018–2025). Designed a star-schema data model with a custom DateTable and six DAX measures including YoY revenue growth, average selling price, and BEV share. The final page overlays GDP growth and a fuel price index against unit sales and revenue to surface the macroeconomic drivers that would appear in a real FP&A reporting pack. No templates, no guided inputs.

EDUCATION

MSc Accounting & Finance | *University of Aberdeen* Sep 2025 – Aug 2026 (expected)

Modules: Financial Analysis & International Accounting, Corporate Finance, Management Accounting, Portfolio Analysis

BBA Accounting & Finance | *Maulana Abul Kalam Azad University of Technology, West Bengal* Jul 2021 – Jun 2024

SKILLS & TOOLS

Finance	3-statement modelling, DCF, WACC & terminal value, budgeting & forecasting, variance analysis, P&L management, scenario & sensitivity analysis, cash flow, management reporting, KPI reporting
Tools	Excel – advanced (INDEX-MATCH, VLOOKUP, pivot tables, automation); Power BI with DAX; SAP S/4HANA; Salesforce; QuickBooks
Methods	Annual budgeting cycle, rolling 12-month forecasts, IFRS/GAAP, process improvement, business partnering
Languages	English (C1), Hindi (C2), Mizo (native), German (A1, studying)

CERTIFICATIONS & DEVELOPMENT

- Bloomberg Market Concepts – Bloomberg LP
- SAP S/4HANA Financial Accounting – LinkedIn Learning
- KPMG UK Audit Job Simulation – Forage
- Power BI KPI Dashboard – Coursera
- QuickBooks Payroll Essential Training – LinkedIn Learning
